## Redefining Material Science: Dahryn Trivedi's Divine Blessings Transform Antimicrobial Drug Silver Sulfadiazine

FPJ Web Desk | Updated: Wednesday, December 27, 2023, 06:31 PM IST

Dahryn Trivedi

In an unprecedented study, scientists have demonstrated the power of consciousness energy to modify the crystalline lattice of an antimicrobial pharmaceutical drug. Published in a peer-reviewed journal, the findings reveal Blessings by an Enlightened Being on silver sulfadiazine rendered tangible changes in its physicochemical and thermal attributes.

The research was designed systematically with stringent protocols. The silver sulfadiazine sample was divided into two parts – one part received remote Blessing from Dahryn Trivedi, a renowned religious and spiritual leader and the other part was left unblessed as a control sample. The samples then went through an array of sophisticated analytical tests including powder X-ray Diffraction (PXRD), Particle Size Distribution Analysis (PSA), Differential Scanning Calorimetry (DSC), Thermogravimetric analysis (TGA)/Differential Thermogravimetric Analysis (DTG). Together, these measured different physical and thermal parameters like crystallite size, particle size, surface area, latent heat, phase transitions and weight loss profiles.

The results revealed staggering changes in silver sulfadiazine Blessed by Dahryn Trivedi across the various parameters compared to the unblessed sample, some key transformations are highlighted below:

PXRD peaks showed alterations in intensities ranging from -75% to +31% and crystallite sizes ranging from -8% to +192% indicating changes in crystal morphology.

The average crystallite size increased tremendously by 64%.

Particle sizes decreased across all fronts – 1.6%, 2.3%, 2.06% and 4.4%, elevating the surface area by 2.6%.

The latent heat of fusion dropped substantially by 21.5%.

Total weight loss declined by 1.86% with 2.88% more residue, signifying better thermal stability.

The significant modifications in properties like crystallinity, particle size distributions and thermal degradation profiles suggest that the Blessing led to the emergence of a new polymorph of silver sulfadiazine.

Polymorphism is known to affect the therapeutic efficacy, bioavailability, and pharmacokinetics of drugs. The treated polymorph with enhanced crystallinity, surface area and stability have scope for designing more bioavailable formulations of silver sulfadiazine. This could improve clinical results and treatment of infections caused by burns, cuts, or bacterial diseases.

Similarly, customized engineering of supplement bioactives through Divine Grace or Consciousness has potential to maximize nutrient delivery, absorption and health benefits.

The radical effects of Divine Blessings from an Enlightened Being, like Dahryn Trivedi, on fundamental properties contravene several established laws and theories in physics and chemistry. Yet the outcomes cannot be refuted since the analytical techniques are the gold standard. It lends credence to Divine Grace and Consciousness as a field outside space-time, action at a distance, etc. and revising existing models to incorporate these could uncover new vistas.

In summary, this novel study makes important contributions that can trigger both incremental applications as well as paradigm shifts across pharmaceuticals, physics, and materials science.

Dahryn Trivedi, co-founder of Divine Connection, is more than just a global religious and spiritual leader. She's an Enlightened Being whose unprecedented Divine Blessings have the power to transform living organisms at the cellular level and materials at the atomic level, elevating the recipient's consciousness and fostering profound character transformation resulting in a much better quality of life.

Alongside her guru and husband, Guruji Mahendra Trivedi, the founder, and pioneer of the Trivedi Effect®, they are on a mission to bridge science, religion, and spirituality by scientifically validating the existence of God. Their research on Divine Blessings is indexed in more than 2,000 universities worldwide, including Harvard, Stanford, MIT, Oxford, and Cambridge, as well as the National Institutes of Health (NIH). Over 6,000 science experiments have led to more than 660 peer-reviewed science publications and over 8000 scholarly citations.

Dahryn Trivedi is a true visionary, ushering in a new era by integrating science, Divinity, and consciousness to vastly improve the human condition. She has shared her message at NASDAQ and has been featured in American national media, including ABC, NBC, Fox, and the CW. Most recently, she was a keynote speaker at the Wellbeing World Conference organized by Business World India. There, she highlighted the soul as the true foundation of wellbeing, evidenced by their recent clinical trial.

The Trivedi Effect® is an unprecedented, scientifically validated phenomenon in which Divine Grace is harnessed by an enlightened being, which can then be transmitted/utilized to transform any living organism at the cellular level, including humans, animals, microbes, plants, and trees, as well as any non-living material at the atomic level, including metals, ceramics, polymers, and chemicals. This is a phenomenon discovered by Guruji Mahendra Kumar Trivedi, founder of Divine Connection, hence, it is termed the Trivedi Effect®.

Divine Connection, through the Blessings of Guruji Trivedi and Dahryn Trivedi is a scientifically validated solution that optimizes human potential, improves health and well-being, leads to a better quality of life through transformation of the mind by raising consciousness.

Over 300,000 people worldwide have experienced the incredible transformative power of Blessings from Guruji Trivedi and Dahryn Trivedi. People report feeling a profound sense of well-being, with huge relief from sleep problems, anxiety, depression, stress, mental restlessness, sadness, fatigue, menstrual struggles, emotional trauma, relationship problems, fast aging, and more, as well as having increased energy, improved psychological and emotional well-being, deeper relationships, purpose in life, professional growth, success, prosperity, happiness and ultimately a significantly better quality of life.
