nificance improvement in the immunity, germination, yield and growth characteristics, which contributed to be not only in the first but also in second generation seedlings.

He added, in another research conducted in UAS by California Pacific Media centre Institution, the results suggest that bio-field treatment administer in the laboratory can induce cell death of brain cancer from a distance while at the same

time promoting viability of normal brain cells. On the other hand, the University of Hawaii, USA reached the conclusion through mice model research the immunity and self-healing power to 600%, which can be a breakthrough on the history of human care industry he also said. Member of parliament, Anant Parejape, Chairman of foundation Tina Marus and Alok Tripathi were present on the occasion.
