**CHICAGO: Mahendra Kumar Trivedi, known more popularly as Guruji, has taken Midwest and Canada by storm.**

He is not a Guru in the traditional sense- neither in look nor in his demeanor. He is wedded more to science and his sole purpose is to challenge the current scientific norms or beliefs and take them to a higher level. His philosophy is a unique mix of modern day science and the traditional belief about Omnipotent Universal Phenomenon, and he demonstrates this with his "Blessings" that help cure physical ailments of humans, boosts the growth of plants and other living organism, and rehashes the components of matter.

This is done thru thought intervention or as he puts it, by "Blessings" of the Supreme entity.

His following is gaining in strength day by day and it is not limited to Indian Americans or Indian Canadians. Non Indians have started outnumbering Indians and some of them have decided to give up their present vocation to be full timers with him to advance his mission in life. An Indian scientist, Dr. Yogi Bhardwaj, with support from other followers has decided to set up a foundation with the sole purpose of spreading Guruji's mission not only in USA but across the world.

The outcome is Divine Life Foundation with headquarters in US. It is now a registered non-profit body and is affiliated to similar organizations in India. However, it has its own independent entity here and as put by Dr. Yogi Bhardwaj, the president, "this is just a start and we need to go global from here."

In a talk to this paper, he said "we need to solidify our gains so far and this could be done only thru institutionalization of the mission and objectives. Guruji wants to reach as many people as possible from all walks of life - common people, scientists, medical professionals and researchers- in order to make a significant dent in their thinking.

We want to make the world a better place to live in. We want to advance science and research in all fields of human activities, and hence this Foundation." The immediate aim of the Foundation is to raise a modest sum of \$2 million, he said, but then it could go many folds.

An approach has already been made to other research organizations and foundations here for their help and collaboration.

"We are sure that that would be done sooner than expected," he beamed with confidence. Citing a few specific examples that demonstrated Guruji's power, Dr. Yogi said that "within a short span of my experience with Guruji, I have learnt a great deal about him, his ability to bring calm to the pain and suffering of many people.

Among the many I have not heard, I think of Jim in Iowa, whom I have known (in fact I am in the process of getting a written letter from him and his Doctor). Jim is suffering from a lung problem and had to be on Oxygen 24 hours a day for years. With Guru Ji's blessings, it took less than a week and just yesterday, he took all of that oxygen apparatus back to the Doctor, and is breathing quite well without the oxygen. In another instance a local gentleman from Gurnee with high diabetes for over 18 years, who was taking Insulin twice a day, had surprising drop in his blood-sugar that went down from some 300 to 112 in a week's time."

Dr. Srikant Patil, who has been with Guru Ji for the last 5 years and accompanies him in this tour, witnessed and participated in various scientific experiments totaling over 4000, clearly showing the effect of Guru Ji's Energy on humans, plants, materials, microbes, viruses and businesses alike," says a humble Yogi Bhardwaj, whose faith and confidence in Guruji is increasing exponentially.
