Guruji Trivedi's journey began in India, where he initially pursued a career in mechanical engineering. However, a profound spiritual awakening in **1995** led him to forgo his profession and dedicate his life to deepening his divine connection. He traversed from the sacred rituals of Indian spirituality to the empirical approach of Western science, earning the revered title "Guruji," and beginning a global mission to share his insights and Blessings.

Establishing himself in Mumbai in **1999**, Guruji Trivedi embraced the belief that if his Divine Grace could transform individual lives, it should similarly enhance all living organisms and non-living materials. Despite initial skepticism from the scientific community, his research yielded successful DNA alterations in microbes and plants and notable changes in the physical constants of materials. These results defy science as the world understands it.

His organization, Divine Connection, offers evidence-based solutions that empower human potential and promote overall well-being. ***The transformative effects of his Blessings have impacted over 300,000 individuals globally, with many reporting life-altering experiences.***

People report a profound sense of well-being, with significant relief from sleep problems, anxiety, depression, stress, mental restlessness, sadness, fatigue, menstrual struggles, emotional trauma, relationship problems, fast aging, and more, as well as experiencing increased energy, improved psychological and emotional wellness, deeper relationships, purpose in life, professional growth, success, prosperity, happiness, and ultimately a significantly better quality of life.

***Through the measure and validation of science, Guruji Trivedi proves the existence of God and demonstrate that God can profoundly impact all living organisms and non-living materials.***

He shows that religion is not limited to subjective experiences and mere faith but can be established as a scientific fact. Guruji has created a new Divine Science that will leave a legacy for thousands of years.
