

ABOUT

Guruji Trivedi

Guruji Mahendra Kumar Trivedi

Guruji Mahendra Kumar Trivedi is an enlightened being with Divine embodiment. He is a spiritual master known for his miraculous and transformative abilities consistently delivering unprecedented outcomes. He is about results, not dogma. Born in India, he initially pursued a career in Mechanical Engineering but felt unfulfilled.

Towards the end of 1995, one night during a trance-like sleep, Guruji was gifted with Divine embodiment through the Grace of God. When he opened his eyes in the morning, he was in a complete state of stillness, having no thoughts at all, absolutely in the state of complete silence. Religion refers to this state of being as **'Enlightenment'**: absolute mastery over one's thoughts and eternal peace of mind.

Guruji Trivedi began wearing the robes of a spiritual master, as is customary by tradition, and started traveling throughout India to Bless people suffering from a wide range of problems. People reported experiencing better physical, mental, emotional and sexual wellness; financial prosperity; deeper and more loving relationships; and improved perception. Out of respect and gratitude, people started to address him as "Guruji," meaning beloved spiritual teacher. In 1999, Guruji established himself in Mumbai, India, and began traveling to numerous countries on all six continents to meet and Bless people. He developed a deep understanding of many cultures, as well as the needs and problems of people and their levels of consciousness. In 2009, Guruji arrived in the USA.

12,000+ CITATIONS

Guruji realized that if his Divine Grace could transform individuals' lives, it should enhance the performance and usefulness of all living organisms and non-living materials. Driven by this belief, using advanced technologies, Guruji challenged the scientific community and pursued scientific research in life sciences and materials science. The journey was very difficult in the beginning. He encountered skepticism from scientists, who found it difficult to accept the transformative power of Divine Grace. However, through his Divine Blessings, Guruji's research established successful DNA alteration in microbes and plants and changes in physical constants of non-living materials.

Despite skepticism, Guruji's results defied current scientific understanding and could not be replicated by man-made machines. With over 6,000 scientific experiments on his Blessings, Guruji has created a new Divine Science that will leave a legacy for thousands of years.

ENLIGHTENMENT	STARTED SCIENCE	FIRST HUMAN CLINICAL TRIAL	CLINICAL TRIAL PUBLISHED IN NIH (USA)
1995	2000	2019	2022

Even more incredibly, Guruji has conducted clinical trials with a multinational Contract Research Organization, evaluating the impact of his Blessings on over 100 blood health parameters.

The trial showed remarkable improvements in the volunteers' immunity, cognition function, motor function, stress levels, organ function, anti-aging, and overall wellness. This first-of-its-kind research was published in multiple peer-reviewed science journals, which are indexed by the NIH.

In conclusion, Guruji Trivedi's mission is to integrate science, religion, and consciousness in order to enhance the well-being of humanity. Through Guruji's pursuit, he proves the transformative power of Divine Blessings, validating the existence of God and restoring believers' faith.

Through the measure and validation of science, Guruji Trivedi demonstrates that God can profoundly impact all living organisms and non-living materials, and that religion is not limited to subjective experiences and mere faith – but can be established as a scientific fact.
